

QA & Validation

For every Independent Software Vendor, Quality Assurance and testing are crucial for maintaining a competitive edge. Poor product quality can result in loss of customers, higher support costs, losing potential customers, legal issues, loss of market share and tarnished brand image. Achieving the right degree of in-house testing and QA capabilities can be expensive, resource-intensive and challenging considering other pertinent issues.

Praxis provides a comprehensive independent Quality Assurance (QA) and validation services adhering to the highest levels of security, usability, interoperability, integration and industry standard processes. Leveraging our dedicated testing teams, QA expertise and resource flexibility, we are positioned to enhance the quality of our clients' products while reducing time-to-market, product costs and management risks.

Our Solution
